

Eco council meetings – (01/02/16)

- Children looked at eco-review
- Children talked about how classes don't recycle
- Children talked about how lights and computers are left on in classrooms at lunch
- They decided they wanted more information to see if there was a problem in some of these areas
- Mr Aspden suggested they create a tally chart to monitor what is happening in different classes with regards to paper recycling and energy consumption
- Agreed with eco council that they would monitor these for 2 weeks and then return with the results.
