### **ICT/Computing Policy**

#### **Introduction**

Through the teaching of Information and Communication Technology (ICT)/Computing, Kinraig Primary School and Nursery prepares pupils to participate in a rapidly changing world through the delivery of a broad and integrated ICT/Computing curriculum. Information and Communication Technology plays an increasingly significant role in society and it is important that our learners are able to utilise technology to help promote their development and independent learning skills as well being given the opportunity to access a wide range of ideas and experiences. Information Technology can support and enhance children's work across the curriculum and should enhance and enrich the learning process. The school has recently moved to using TeachComputing to aid teachers in teaching the computer curriculum.\a

#### **Aims and Objectives**

Children will have the opportunity through the ICT/Computing Curriculum, as well as other curriculum areas, to develop ICT skills. Children will be taught to choose and use appropriate applications with confidence and a sense of achievement, develop practical skills in the use of ICT/Computing and be able to apply these skills to the solving of relevant and worthwhile problems. Children will be taught to understand the capabilities and limitations of ICT and the implications and consequences of its use.

#### **Kinraig Primary School and Nursery and the Internet**

The school has a policy for the safe use of the Internet (see internet and email policy).

#### **Responsibilities of the ICT Co-ordinator**

- Monitor the implementation of this policy.
- Monitor the delivery of the National Curriculum within each year group.
- Offer guidance to teachers to ensure that pupils progress and develop skills in their ICT capability.
- Collect samples of work once a term from each class and across abilities with reference to the curriculum. This review will inform any subsequent changes to the schools ICT/Computing Curriculum plan.
- Ensure a continuous and evolving training programme and co-ordinate individual staff training requirements.
- Where appropriate the ICT Co-ordinator will team teach specific ICT skills to classes where the teacher may be lacking confidence.
- Coordinate the development and maintenance of a school web site, in consultation with other interested parties (staff, pupils, parents and governors).

### **Responsibilities of Staff**

- Deliver the National Curriculum for Computing including the use of ICT in other curriculum areas as much as possible.
- Follow the TeachComputing programme of study and guidelines outlined in this document.
- Ensure regular ICT access for all pupils.
- Be aware of their training needs in delivering the ICT/Computing curriculum and using available technology, and to discuss these with the ICT Co-ordinator.
- Formatively assess children's progress in ICT/Computing.
- To ensure that children are aware and have an understanding of E-Safety issues appropriate for their age through explicit E-Safety lessons as well as throughout other areas of the curriculum.
- Look after their identified individual resources as well as shared resources and return them safely.

### **Planning**

Planning for each year group should be used to identify the broad skills areas to be taught. Medium Term planning should identify the progression of skills and highlight each area that the teacher needs to focus on each half term to achieve this.

### **Teaching and Learning**

Teachers can choose to deliver the Computing programme of study using either iPads or Laptops depending on the need of the module. Skills developed should be reinforced in the classroom wherever possible using a range of resources (e.g. using spheros /beebots/programmable toys,).

### **Assessment**

The class teacher should be aware of the skills and targets set in their Medium Term Plans and should provide ample reinforcement for this learning to take place.

The class teacher is expected to identify children who are underachieving in a particular area and direct extra support.

The Computing Curriculum Leader will collect annotated samples of children's work/photographs each term to collate in a Portfolio of Evidence for ICT across the school.

### **Monitoring**

The effectiveness of planning will be monitored half-termly by the Computing Curriculum Leader.

The Computing Curriculum Leader will monitor the quality of teaching and learning in ICT across the Key Stages through observations and planning moderation.

The Computing Curriculum Leader will keep a portfolio of children's work with the support of other staff as appropriate. This portfolio will be available to moderate children's work and will provide evidence of achievement and progress across the age range.

### **Resources**

All teachers have a Laptop and iPad that they can use in school or at home. They have to sign an iPad and Laptop agreement with the school.

The ICT trolley has 8 windows laptops.

There are 80 iPads used across Key Stage 1 and Key Stage 2.

Each Year Group has access to a wide range of software as well as the Internet. Each class has an interactive whiteboard, which should be used daily to enhance teaching and learning. In addition to computers, there is a range of other ICT resources in school.  
The hall laptop is connected to a projector and sound system.

**Inclusion**

We recognise and understand that all pupils are entitled to equal opportunities to access ICT. This includes both specific skill acquisition and opportunities to apply ICT capabilities.  
In order for all pupils to achieve their full potential we recognise that equal opportunities will involve positive discrimination. This will involve greater access for some pupils to learn and consolidate basic skills thereby allowing them equal access to use ICT applications as a resource to support their learning in other curriculum areas.  
We recognise that ICT can provide an important motivational tool for SEN pupils.  
ICT will be used to support specific learning objectives e.g. numeracy and literacy skills, through the use of Educational Software in particular.

**Maintenance**

Any maintenance or network issues need to be reported to the Computing Curriculum Leader or ICT Technician immediately.

**Professional Development**

The Computing Curriculum Leader will recognise the need for and will endeavour to provide ongoing professional development in ICT and ensure a well-balanced delivery in the classroom.  
Annual Staff development will be incorporated into the Computing Curriculum Leader Action Plan, taking into account the needs of the school and staff. Regular staff training sessions will be led by the Computing Curriculum Leader outside agencies.

Policy last update -09/09/21

The Computing Policy at KinCraig Primary School will be reviewed and modified on a regular basis at least every two years. It is possible to add amendments to this document prior to a review and these will be incorporated into the next issue. To add comments please complete the information on this sheet adding the date and signing where indicated.
